

# **EuroNanoForum 2017**

**Malta, 21-23 June 2017**

## ***Session 3***

***Nano-enabled healthcare, nano-medicine and medical technologies***

**Hélène Chraye, European Commission**

# The future regulatory system

## A new EU regulatory system for medical devices :

- **Regulation (EU) 2017/745**
- **Regulation (EU) 2017/746**

## The new regulations will ensure:

- **a consistently high level of health and safety protection for EU citizens using these products**
- **the free and fair trade of the products throughout the EU**
- **that EU legislation is adapted to the significant technological and scientific progress occurring in this sector over the last 20 years.**

## **Practical Implications**

- **Certification will be carried out by MS Notified Bodies**
- **EU support fulfils two objectives :**
  - **accelerate incorporation of additional security requirements in developing medical technology products**
  - **boost developing pre-certification services inside the EU**

# **Nanotechnology for Medical Technology – a New Dawn in Healthcare : how might nanotechnology influence healthcare**

**The major challenge for medical technology today is to determine how better Medical Technology based products can be brought to market in a shorter time frame so as to ensure the health and well-being of European citizens**
